

SWL 3230

Skid Steer Loader

- Engine power 55.4kW
- Machine weight 3500kg
- Rated operating capacity 1100kg

Operation with pilot handles

◆ Pilot Handles

Traveling and actions are all controlled by pilot handles, featuring light and handy and agile operations.

◆ Double-accelerator Control

The SWL3230 skid load is of the double-accelerator control mode. The manual accelerator control is used for working places requiring a constant power, while the foot pedal accelerator is used for excavation and loading.

◆ Strong Power

The customized Kutoba engine imported with original packaging can reach the strictest emission standards (EU Stage5 and EPA T4F), and it features strong power, high reliability, low noise, energy saving and environmental protection.

◆ Curve Hoisting Trajectory

Optimized structure designation enable machine to have higher lifting height than other brand.

◆ Closed Hydrostatic Traveling System

Static hydraulic traveling system, equipped by advanced anti-overloading hydraulic device, large-torque motor, big driving force, with self-brake function, safe and reliable.

◆ Standard Quick Coupler

Adapt to international common quick coupler, fast change various kinds attachment. Majority of attachments can be used in Sunward skid steer loader.

Equipped with heater and air conditioning, choose appropriate configuration depending on different regions.

A large-discharge system can be selected. With the confluence of two pumps, the product increases the output discharge to meet the demands of more large-discharge accessories such as milling machine.

- Wide space and good vision, easy in and out, all of button and switch is reachable.
- Conform to FOPS/ROPS standard cab structure.
- Three-level electric starting protection system.
- Complete warning beacon, warning signal and reverse horn.
- Rear window detachable.

◆ **Standard Hydraulic Horizontal Hoisting**

Standard hydraulic horizontally, lift the movable boom ensure invariant bucket angle with the ground, to prevent falling material, reduce the labor intensity of the operating personnel.

◆ **Emergency Descent Function of Working Unit**

The boom can safely conduct the emergency descent in case of the stalling of engine.
